No

During which normal operating activities are you collecting information on service line material?

Service line repair/replacement

Did you develop or revise standard operating procedures to collect service line material information?

No

Identify the service line investigation methods your system used to prepare the inventory.

None

Who owns the service lines for your system?

The ownership is split (the water system and customer)

Is there documentation that defines service line ownership in your system, such as a local ordinance?

Yes

Describe ownership documentation and explain where the ownership is split (e.g., property line, curb stop).

Bear Springs Trails Water Supply Corporation By-Laws. As a WSC customers own the system collectively and customers own their lines

Describe when service lines were generally installed for your system?

2000 and 2004

When were lead service lines banned in your system?

Reference the state or local ordinance that banned the use of lead in your system.

Are there lead goosenecks, pigtails or connectors in your system?

No

40

Total Service Lines in Inventory:

40

Service Line Lead Category	Old Value	New Value	
Lead	0	0	
GRR	0	0	
Unknown	0	0	
Non-Lead	0	40	

ACKNOWLEDGMENTS

- ☒ I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.
- ☒ As the PWS Representative, I understand that if any additional service lines are subsequently identified as Lead, Galvanized Requiring Replacement, or Lead Status Unknown, the PWS is required to notify the State within 30 days of identifying the service line(s) and must prepare an updated inventory using Lead Service Line Inventory.
- ☒ As the PWS Representative, I understand that the PWS should maintain for review any resource, information, or identification method used for the development of this initial inventory. These records do not need to be submitted to TCEQ but should be available for review.
- ☒ As the PWS representative, I understand that customers with a lead, galvanized requiring replacement, or lead status unknown service lines should be informed within 30 days of completion of initial LSLI and annually thereafter until the service line is replaced.
- ☒ As the PWS representative, I understand that the PWS should provide an updated LSLI in accordance with its tap sampling monitoring period schedule, but no more frequently than annually. The updated LSLI must be submitted within 30 days of the end of each tap sampling period.
